

Wi-Fi Smart Circuit Breaker

Instruction Manual

>>>

Main Function

02

Main Data Parameter

Protocol: Wi-Fi (Default)
 Rated Operating Voltage Range: 90V-240V
 Control Type: Remote Control, Manual
 Poles Description: 1P+N (N Pole Pass-through)
 Customization: Lora / SigMesh / RS485 / RJ45
 Model selection: Non-metering Type
 Metering Type (1~63A current adjustable)

Indicator Description

Non-metering Type

The LED indicator shows a blue light, indicating that the device is in an on state.

The LED indicator shows a light out, indicating that the device is in an off state.

The LED indicator shows blue flashing, indicating that the device is in pairing mode.

03

Metering Type

The LED indicator shows a blue light, indicating that the device has been connected to the network.

The LED indicator shows blue flashing, indicating that the device is in pairing mode.

The LED indicator shows a light out, indicating that the device is in an offline state.

The button indicator shows a light up, indicating that the device is in an on state.

The button indicator shows a light out, indicating that the device is in an off state.

Live View (Metering Type Only)

Can monitor the current, voltage, and power of the load equipment in real time, and can also record the power consumption of the year, month, day, hour, and different time periods, helping users to check the power consumption of load equipment more clearly. Setting the switch status of the equipment in different scenarios, and remotely monitor the real-time situation of the load electrical appliances.

04

Configuration Steps

First Step:

Connect the wires from the upper of the Wi-Fi Din Rail Switch, connect the live wire to the L pole and the neutral wire to the N pole, please make sure that the wiring is correct and the WiFi signal is strong.

05

Second Step:

Download, register and log in to the "Smart Life" or "Tuya Smart" App. Connect your phone to 2.4GHz WiFi and turn on Bluetooth. Ensure that the device is in pairing mode(LED indicator is blinking).

If the wifi indicator is not blinking, please reset the device: long press the power button for 5 seconds, the wifi indicator blinks.

Third Step:

Click "Add Device" and the device will be automatically searched for on the "Add Device" page. Then click "Add".

Fourth Step:

Enter your WiFi account and password, and click "Next". Wait patiently, the device is connecting to the network.

06

Fifth Step:

Click 'Done' and the device has been successfully added.

Sixth Step:

After successful connection, the LED indicator light will change from flashing blue to stopping flashing.

07

Installation And Wiring Diagram

This product does not have isolating function and short circuit protection function, and requires a circuit breaker to be configured at the upper part for use. The wiring is shown in the figure.
