

## CJ19 Condenser contactor

CJ19 series switching condenser contactor (hereinafter referred to as contactor) is mainly used in power lines with AC 50Hz (or 60Hz) and rated working voltage up to 400V, for low-voltage reactive power compensation equipment to put into operation or cut off low-voltage parallel capacitors. The contactor is equipped with a surge suppression device, which can effectively reduce the impact of the closing surge on the capacitor and suppress the overvoltage during disconnection. '

## Working conditions

- ◆ Ambient temperature: -5°C ~ +40°C, the average value within 24 hours does not exceed +35°C;
  - Altitude: no more than 2,000m;
  - Atmospheric conditions: When the maximum temperature is +40°C, the relative humidity of the air does not exceed 50%; higher relative humidity can be allowed at lower temperatures, such as 90% at 20°C. Special measures should be taken for occasional condensation due to temperature changes;
  - ◆ Pollution level: 3;
  - ◆ Installation category: Category III;
  - ◆ Installation conditions: The inclination between the installation surface and the vertical surface is not greater than ±5°;
  - ◆ Impact and vibration: The product should be installed and used in a place without significant shaking, impact and vibration.

## Appearance and installation

In addition to being installed with screws, the container can also be installed with a rail.

### Example

Model: CJ19-32

## CJX2 AC contactor

CJX2 series AC contactors (hereinafter referred to as contactors) are mainly used in circuits with AC 50Hz or 60Hz, voltage up to 690V, rated working current up to 95A under AC-3, 400 (380)V use categories, for remote connection and disconnection of circuits, frequent starting and control of AC motors, and can be used with appropriate thermal relays to form electromagnetic starters to protect circuits that may be overloaded.

Compliance: GB/T14048.4, IEC 60947-4-1.

### Working conditions and installation

- ◆ Ambient temperature: -5°C ~+40°C , the average value within 24 hours does not exceed +35°C;
- Altitude: no more than 2,000m;
- ◆ Atmospheric conditions: When the maximum temperature is +40°C , the relative humidity of the air shall not exceed 50%; higher relative humidity can be allowed at lower temperatures, such as 90% at 20°C . Special measures should be taken for occasional condensation due to temperature changes;
- ◆ Pollution level: 3;
- ◆ Installation category: Category III;
- ◆ Installation conditions: The inclination between the installation surface and the vertical surface shall not exceed ±5°;
- ◆ Impact and vibration: The product should be installed and used in a place without significant shaking, impact and vibration.
